④ Introduction

2Draw allows the teaching of Graphical Modelling in a powerful way. It is supported by video tutorials explaining the key concepts of working with scaleable images and helping you to plan activities to solve many problems, from placing desks and computers in a classroom to creating images that will animate perfectly in 2Create.

Operating System: Windows 95/ 98 / 98SE / ME / 2000 / XP / NT-4
Processor: Recommended Pentium II, 100MHz (if used intensively, more processor power required)
Memory: Minimum 32MB RAM (if used intensively, more RAM required)
Hard Drive: 30 MB min
Display: Minimum 800x600, 16 bit High Colour (Recommended 1024 x 768)
CD-ROM Drive Required for Installation
Standard Mouse , Keyboard
Printer

If you require help, please do not hesitate to contact our technical support
on: **(+44) 020 8203 1781**
or: **www.2Simple.com/support**
**or email: support@2simple.com**

⑥ Installation

Follow the instructions on the 'Quick Start' card.

If these do not work, then:

1. Put the CD in the drive.

2. Double-click the 'My Computer' icon on your desktop

3. Double-click the 2Draw icon to commence the installation

4. Follow the instructions on screen to complete the installation.

This will install your software and add a link from the Start Menu to 2Draw.
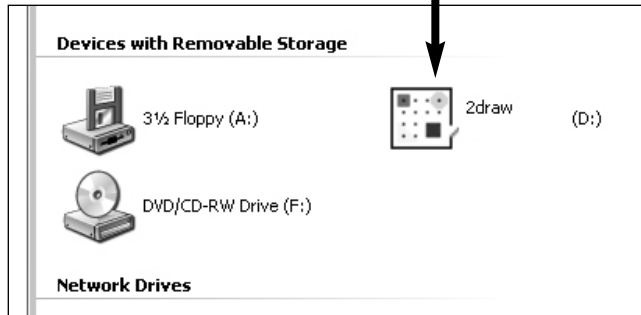

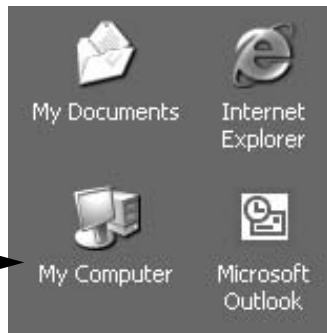

Installing 2Draw

2Draw is designed to work on ALL networks. You can find clear installation instructions on the CD and we provide full support on our website: **www.2simple.com/support**

If you need help with a specific installation, please do not hesitate to contact us via our website or email us at **support@2simple.com**

2Simple will provide MSI installations free of charge.

As networks differ from one another, we can and will help you when needed. If any of our instructions do not work, please do contact us as we want to provide accurate information and we rely on your feedback to help us get it right.

All our software is designed on the following principles:

SIMPLICITY OF USE
The software has evolved in the classroom to meet the needs of young pupils. It is simple to learn and simple to use. There are no 'wrong buttons' to press.

TRANSFER OF SKILLS
All our software has a common look and feel. It is designed to take pupils from what is familiar towards standard Windows™ interfaces.

DEVELOPED IN THE CLASSROOM FOR THE UK CURRICULUM
The software has been developed to meet the needs of the UK curriculum. It has been tested and refined in the classroom, and has evolved based on research and suggestions from teachers.

VIDEO OF IDEAS FOR ACTIVITIES
All our software comes with a large number of ideas for use and tutorials. These take the form of short videos which run on the computer and teach staff and pupils to use the software in an appropriate curriculum context.

EMPHASIS ON CREATIVITY
Making the software simple allows pupils to focus on the content of their work. Whilst the software is powerful, it is the pupils who are creating, not the computer.

READING AGE
Many pupils are held back by complex language in some software packages. Our software uses simple icons and appropriate text, ensuring reading age is not a barrier to ICT learning.

INDEPENDENT USE
The simplicity of the software, combined with the use of video, makes the software ideal for independent use.
